Should Have Known

Bleed The Dream

I should have known what I was in for
I should have hit the ground running
But I never saw it coming
You always acted like you've never
Been through this before
How would I have figured out?What do you take me for?
Now I know you're just a joke
They're gonna settle the score
Gonna know you're just a joke
Break, break but you cannot lie
They're gonna know
They're gonna knowIn your face
When I see a shallow disgrace
You left behind
Memories of your tasteAnd I should have known what I was in for
I should have hit the ground running
But I never saw it coming
You always acted like you've never
Been through this before
How would I have figured out?What do you take me for?
Now I know you're just a joke
They're gonna settle the score
Gonna know you're just a joke
Break, break but you cannot lie
They're gonna know
They're gonna knowWasted days
Did you get the wrong idea?
A step behind
We're going all the wrong directions hereAnd I should have known what I was in for
I should have hit the ground running
But I never saw it coming
You always acted like you've never
Been through this before
How would I have figured out?And the days pass by so fast
You never knew what you were getting into
You never knew what you were getting into
And you never knowBut I should have known what I was in for
I should have hit the ground running
But I never saw it coming

You always acted like you've never
Been through this before
How would I have figured out?
