Evaporate

Shakhan

You say its hard preparing for the coming test.
Stuffing your head full of those facts to do your very best.
You say if you firmly squeeze go and squeeze your brain.
Then all those facts will then slip out again.Yet I say its hard to be still and wait for the time to evaporate.
You say its hard working your body in a race your face
turns red as your trying hard to keep up the pace.
Gravity over come and then stands to the side to rest.
Fuels pumped by pure muscle submerged in your chest.Yet I say its hard to be still and wait for the time to evaporate.You say its hard working your body and brain.
Feeling like youre at the fair ground on a runaway train.
I asked shouldnt you be careful you could leave lifes track
End up in a six-foot hole on your back.Yet I say its hard to be still and wait for the time to evaporate.
