

It Always Will Be

Willie Nelson

Sometimes I think that love is somewhere
Livin' on an island all alone
I can see it in the darkness
I can feel it in the distance and then it's gone And then I know that it is time
For me to go and find my favorite girl
'Cause when I look into her eyes I see
All the love there is in all over the world And it always will be
And it always will be
And it always will be
It always will be There are some things I think about
And every time I do it breaks my heart
And there is nothing I can do
About this loneliness I feel when we're apart And I stop and curse the darkness and the distance
And then your face I've see
And when I look into your eyes I've see
All the love there is inside of me And it always will be
And it always will be
And it always will be
It always will be And it always will be
And it always will be
And it always will be
And it always will be
