

# Novelty

[Kate McGill](#)

When people listen to you don't you know it means a lot?  
'Cause you've got to work so hard for everything you've got  
Can't rest on your laurels now not when you've got none  
You'll find yourself in a gutter right back where you came from Someone told me being in the know is the main  
thing  
We all need the security that belonging brings  
Can't stand on your own in these times against all the odds  
You'll just fall behind like all the other sods You slap our backs and pretend you knew about  
All the things that we were gonna do  
What ya gonna do, what ya gonna do when it's over? You're on your own now don't you think that it's a shame?  
But you're the only one responsible to take the blame  
So what ya gonna do when the novelty has gone?  
Yeah, what ya gonna do when the novelty has gone? You slap our backs and pretend you knew about  
All the things that we were gonna do  
What ya gonna do, what ya gonna do when it's over?
