

Stars (feat. Jonny Rose)

Vicetone

I've been reading the stars
Seems like we're meant to be,
It played out like a prophecy,
You came on like a vision in the dark,
Like the daylight through the stars.
If it's hard to read,
One look at the sky and you'll see,
Don't take it for granted,
When the planet's all alive.
I've been reading the stars,
I've been moving your heart,
So we can be together again,
So we can make it 'till the end.
I've been reading the stars,
I've been counting the hours,
So we can be together again,
You and I.
I've been reading the stars
I've been reading the stars
I've been reading the stars
Seems like we're
meant to be,
It played out like a prophecy,
You came on like a vision in the dark,
Like the daylight through the stars.
If it's hard to read,
One look at the sky and you will see,
Don't take it for granted,
When the planet's all alive.
I've been reading the stars,
I've been moving your heart,
So we can be together again,
So we can make it 'till the end.
I've been reading the stars,
I've been counting the hours,
So we can be together again,
You and I.
I've been reading the stars
I've been reading the stars
I've been reading the stars
