

Give Me Something

Scars on 45

I carved your name
In an old, old tree,
But the council chopped it down
Because it was filled with disease. And I sent you a thousand messages,
But not a single one got through... Please,
Give me something;
Something to hold on to.
Give me something,
That links me to you.
Give me something;
Something to hold on to,
And I'll wear your wedding ring for a lifetime. I've seen a place
Where your fingers lock with mine.
But the view it disappeared,
As my alarm clock hit the time. And I've made a million wishes now,
But not a single one? s come true... Please,
Give me something;
Something to hold on to.
Give me something,
That links me to you.
Give me something;
Something to hold on to,
And I'll wear your wedding ring for a lifetime. Please,
Give me something;
Something to hold on to.
Give me something,
That links me to you. Give me something;
Something to hold on to.
Give me something,
That links me to you. Give me something...
Give me something...
Give me something...
Give me something...
