Our Final War

Truth Before Treason

Oppression
The police walk the streets of the town
Governing with intent to imprison
The only thing that they govern is fear

Stop them
Stop them - this is our final war

Gunned down on the streets
Individuals with opinions
Can't you see that speech is no longer free?
Military equipment that we paid for
Will be used against us
It's our time to die

How many innocent must die before you care?
(How long will we suffer?)
(How long until we care?)
