

West Coast Wind

The City Drive

Put your pain aside
It's not the end of time
From where I'm standing Come outside
Before you come undone
We'll take a drive
So you can breathe The West coast wind tonight
Whispers under the starlight
Tomorrow's a new day You've beat this before
And you can once more
'Cause you're not stranded Kiss goodbye
The shadow you're under
And take some time
To get free The West coast wind tonight
Whispers under the starlight
Tomorrow's a new day Before the morning breaks
We'll make a quick getaway
Tomorrow's a new day The pressure's been pushing down on you
Your mind can't make up what to do
It has been tugging at your sleeve When all that you need is to be calm, calm
When you feel it coming on
When you feel it coming on The West coast wind tonight
Whispers under the starlight
Tomorrow's a new day Before the morning breaks
We'll make a quick getaway
Tomorrow's a new day
