Long Way to Fall

Autopilot Off

Eyes fixed and dilated
Stuck starin' out
So jaded and frustrated
Draggin' you downYou can only see so much
When you're relying on your eyes
There's an instinct inside everyone
It's the engine and the driveIt's a long way to fall
Once you lose all those aspirations
It's a long way to fallWhat I've got in my heart and my head
I won't give it away because it's all that I am
What I've got in my heart and my head
I won't give it away because it's all that I amSo listless, indifferent
Distant and cold
No feelin', no meanin'
Stuck in a holeLeave your ideals with your memories like they're
Somethin' you've outgrown
And the days go by you're paralyzed and you slowly
Turn to stoneIt's a long way to fall
Once you lose all those aspirations
It's a long way to fallWhat I've got in my heart and my head
I won't give it away because it's all that I am
What I've got in my heart and my head
I won't give it away because it's all that I amLong way to fall
Once you lose all those aspirations
It's a long way to fallWhat I've got in my heart and my head
I won't give it away because it's all that I am
What I've got in my heart and my head
I won't give it away because it's all that I amWhat I've got in my heart and my head
I won't give it away because it's all that I am
What I've got in my heart and my head
I won't give it away because it's all that I am
