

Custom Rock

Conflict

There must be a better way
There must be another way
There must be a clever way
(But don't give the game aay)
There must be another way
There must be a better way
There must be a quicker way

21, good looking from New York

Custom built to make good bussiness talk (It makes the women talk)

Next (new) product from their factory of life (lies)

The shooting of a star that could never,
not ever, survive.

Custom rock sounds like a sex aid, Just as cheap and twice as nasty

A carefully planned deception, another cash-in on reality.

Rebellion from the N.M.E. costs 50p the positive direction N.M.A. build bombs
for E.M.I. and support apartheid foundations.

"To spread the message further" get across to a wider spectrum that we need no
nukes or fascists, we should unite and then take vengeance, Well I'm sorry we
can't take seriously your whining groans of hope.

You made your world now live In It, to us you're just a standing joke.
