Indecision

Simple Jack

When we lash out
A common disease
It's a sickness it's a sickness it's a sickness
And its comin from meWhen you walk out
You leave me at peace
It's a given it's a given it's a given
I don't want it to ceaseWhen I comin a round I gotta see you
When you comin around you gonna leave me
These indescretions are so sweet
When you lookin at me it makes my heart drop
When I lookin at you it makes you break out
This indecisions killing meWhen you cry out
Are you cryin for me
Indecision indecision indecision
But its breakin me freeSo I cry out
come to me please
Indecision indecision indecision
And its makin you freezeWhen I comin around I gotta see you
When you comin around you gonna leave me
These indescretions oh so sweet
When you lookin at me it makes my heart drop
When I lookin at you it makes you break out
This indecisions killing me
repeat
