

# The Valley of Strathmore

## Silly Wizard

By the clear and the winding stream  
In the valley of Strathmore  
Where my love and I have been  
Where we'll wander never more But if time was a thing man could buy  
All the money that I have in store  
I would give for one day by her side  
In the valley of Strathmore From the glen of the golden and green  
I left for a land far away  
Where sadness has never been seen  
And joy only costs a day's pay But if time was a thing man could buy  
All the money that I have in store  
I would give for one day by her side  
In the valley of Strathmore If time was a thing man could buy  
All the money that I have in store  
I would give for one day by her side  
In the valley of Strathmore In Strathmore, there's a long working day  
For a man with his hands on the plow  
But it's work, I'd be happy to do  
If at night I were lying with you But if time was a thing man could buy  
All the money that I have in store  
I would give for one day by her side  
In the valley of Strathmore As I take a long draft from my glass  
I'm drinking alone here again  
And I try not to think of my lass  
For the old days will ne'er come again But if time was a thing man could buy  
All the money that I have in store  
I would give for one day by her side  
In the valley of Strathmore If time was a thing man could buy  
All the money that I have in store  
I would give for one day by her side  
In the valley of Strathmore
