

Lupe Back

Lupe Fiasco

[Lupe Fiasco - Verse 1]Yield, to the forces of darkness

I bring you the torches of our shit

Reinforced with hardness of Wolverine's

Arms with the harshness and overall sharpness

Now how far do the arms get?

My nigga, from the stars to the starfish

From the baby to the bomb

It's a whole lot of light and a whole lot of armlift

My arms long, but I'm lawless

A strong arm, I can lift up all this

You gon' have to build a bigger farm for us

To keep them wolves out of Old MacDonald barn, bitch

Yeah, Team Jacob

We're long armed, put my arms on a lear

Everytime I put my hands in the air

Watch the throne as I dance in the chair

Throw my crown in the crowd, hope it lands on the heir

The weak niggas like to pass interfere

Spend a lot of lint over jams in the year

That act like the man up in here

That don't count when your only real fan is a mirror

That's subliminal to any nigga that he feel he is too

But you don't stand a chance, playa

I am there, Chi-Town, fan of the Bears

Love where they dance in the square

Yeah, Yankees too, but only cause Granderson there

And now wears khaki pants on La Brea

We all friends, why your man lookin' scared?

Turning whiter than Anderson hair

Came out the garage like he saw a phantom in there, huh

[Verse 2]Oh shit alert, Louis clothes

Callin women bitches, Louboutin and Gucci shows

Well, I guess there goes my Louis shows

More o shit, if your role model's a movie role

And if you live your life like it's a studio

Talkin' to us like we mics, a bunch of you ain't do befo'

Electric fences for a urinal

Also keep a toaster in my jacuzzi, yo

Shock-a-zulu, call me Wasalu II
Oh shit, man these record labels prostitute you
Strap them to sushi bars, and feed em lots of fugu
Catch a bad piece
You can stick that 360 between your asscheeks
Artists let's mobilize and unionize like the athletes
Radio is making our craft weak
Forced to repeat the same dumb shit that work
Only as hot as your last beat
And rappers, they relating to that last piece
Album never leave they desk if you don't got no B.D.S
Sacrifice your publishin', they said you really need a hook
And they ain't gon' pay you, said that you received a look
And what's stupid real, is what producers feel
Twenty placements or you stuck in that producer deal
And R&B chicks so get it the wildest
All they money goes to hairdressers and stylists
Gotta keep up with that image
Label lose they mind if they ever see a blemish
ProActiv impeals, airbrushers and trainers
Managers suggest you fuck a nigga to be famous, huh
But it's all entertainment
Wonder when Cobain blew out his brains, did he blame it?
And if those snakes in the industry helped him aim it
Started pressing up records before the bullet left the chamber
I fight evil, everyday I'm livin'
Rest in peace to men, women and the children
And middle fingers to the Pilgrims that killed 'em
Friend of the People, happy Thanksgiving
