

The Big Sky (Single Mix)

Kate Bush

They look down
At the ground
Missing
But I never go in now Im looking at the big sky
Im looking at the big sky now
Im looking at the big sky
You never really understood me
You never really tried That cloud, that cloud
Looks like ireland
C'mon and blow it a kiss now
But quick 'Cause its changing in the big sky
Its changing in the big sky now
Were looking at the big sky
You never understood me
You never really tried This cloud, this cloud
Says Noah
C'mon and build me an ark
And if you're coming, jump
'Cause were leaving with the big sky
Were leaving with the big sky
Were leaving with the big sky
Were looking at the
Were looking at the
And we pause for the jets
Hup, hup, in the big sky Were leaving with the big sky
You want my reply?
What was the question?
I was looking at the big sky Were looking at the
Tell 'em, sisters
Rolling over like a great big cloud
Rolling over with the big sky
Rolling over like a great big cloud
Rolling over with the big sky
Rolling over like a great big cloud
Rolling over with the big sky
Rolling over like a great big cloud
Rolling over with the big sky Rolling over like a great big cloud
Rolling over with the big sky
Rolling over like a great big cloud

Rolling over with the big sky
Rolling over like a great big cloud
Rolling over with the big sky
Rolling over like a great big cloud
Rolling over with the big sky
Rolling over like a great big cloud
Rolling over with the big sky
Rolling over like a great big cloud
Rolling over with the big sky
