Future Shock

Stratovarius

I saw it in a dream
The day that changed our history
I still can hear the screams
Swear it was no mysteryIn the heat of blast
Houses fell down into the ground
This happened so fast
Mankind disappeared without a soundNow the world lives
In the shadow of atomic fear
Can we win the fight for peace
Or will we disappear?Future shock
Future shockI saw it on the screen
The day that changed our lives and history
There goes our dream
Nuked into the sky don't know whyIn the heat of the blast
Watch the beauty of the mushroom cast
It won't take long
You won't live till the end of this songNow the world lives
In the shadow of atomic fear
Can we win the fight for peace
Or will we disappear?Future shock
Future shockNow the world lives
In the shadow of atomic fear
Can we win the fight for peace
Or will we disappear?Future shock
Future shockFuture shock
Future shock
Future shock
Future shock
