Resurrect Me

All Tvvins

Didn't know til I looked at the time and the hands weren't moving at all
Didn't see til I saw that my body was separated from my soul
All the folks that were coming and going were toing and fro on the beach
All the questions and cues on the light rings a roll off like horses and meat

It was you that carried me out in the street
It was you dragging me back to the shoreline

There was water inside of my boots, I could sink like a professional mark
Now there's nothing but chalk on my hands when I hold you in the dark

It was you that called me a soldier
Always you with the shrug of a shoulder

I know you would if you could, If you could I know you would
I know you would if you could, If you could I know you would
Ressurect me, Ressurect me, Bring me back to life, Ressurect me

There are things that I wish i could do, there are things that I wish that I said
Lying bones in the sand, cup the tears in my hand, I didn't know I was dead

It was you holding my bones in your arms
Always you if tears could be swapped for your charms

I know you would if you could, If you could I know you would
I know you would if you could, If you could I know you would
I know you would if you could, If you could I know you would
I know you would if you could, If you could I know you would
Ressurect me, Ressurect me, Bring me back to life, Ressurect me
Ressurect me, Ressurect me, Bring me back to life, Ressurect me

It was you blowing the smoke from my eyes
Always you calling me back to the light
It was you pulling me back from the edge
Always you pulling the darkness back from my chest

I know you would if you could, If you could I know you would
I know you would if you could, If you could I know you would
I know you would if you could, If you could I know you would
I know you would if you could, If you could I know you would
