

# Peacekeeper (live from AOL sessions)

## Fleetwood Mac

We make all of our suns the same  
Every one will suffer the fire we've made  
They all explode just the same  
And there's no going back on the plans we've made  
Peacekeeper take your time  
Wait for the dark of night  
Soon all the suns will rise  
Peacekeeper don't tell why  
Don't be afraid to fight  
Love is the sweet surprise  
Only creatures who are on their way  
Ever poison their own well  
But we still have time to hate  
And there's still something we can sell  
Chorus  
When the night is cold and still  
When you thought you'd had your fill  
Take all the time you will  
This is not a test, it's not a drill  
Take no prisoners, only kill  
You know all of our friends are gods  
And they all tell us how to paint our face  
But there's only one brush we need  
It's the one that never leaves a trace  
Chorus  
When the night is cold and still  
When you thought you'd had your fill  
This is not a test, it's not a drill  
Take no prisoners, only kill
