## **Set You Free This Time**

## **Gene Clark**

The first thing that I heard you say
When you were standing there
Said in your way was that you were not blind
You were sure to make a fool of me

Tou were sure to make a roof of me

'Cause there was nothing there that you could see

That could go beyond your mindNow who's standing at the door

Remembering the days before

And asking please be kind

It isn't how it was set up to be

But I've set you free this timeI have never been so far out in front

That I could ever ask for what I want

And have it any time

Knowing this you found the thought for me

That told you just what I should be

And there I stood behindWith all the ones that were before

And memories that only seem

To tear me from my mind

In front of what it is you see me to be

I've set you free this timeI could never find a chance to choose

Between a way to win or a thing to lose

Because there was your stand

On top of all of the love you took

That was only something

You could look at lying in your handNow who's wondering what has changed

And why it cannot be arranged

To have each thing work fine

It isn't how it was set up to be

But I've set you free this time
