

Holly Wood Died

Yellowcard

Accidents out on the highway to somewhere
They tell us about when we we're young
Rescuers working to clean up the crashes
Before she can see what they've done Nobody told her she'd lose in the first round
The last fight was fixed from the start
Name's on her sidewalks they move through her body
Like razors they cut through her heart
Like razors they cut through her heart Hey, let go of all you know, let it fly away now
What have you got to lose?
And say out loud these words I've found
I'll be there when you come down, I'll be waiting for you Night life the high life she just wants a good life
So someone remembers her too
But somewhere she heard there was some place to go
When you die when you live like we do
Die when you live like we do Hey, let go of all you know, let it fly away now
What have you got to lose?
And say out loud these words I've found
I'll be there when you come down, I'll be waiting for you Hey, let go of all you know, let it fly away now
What have you got to lose?
And say out loud these words I've found
I'll be there when you come down, I'll be waiting for you Hey, let go of all you know, let it fly away now
What have you got to lose?
And say out loud these words I've found
I'll be there when you come down, I'll be waiting for you
