

# Driving

## Arab Strap

I was awake I overheard your speech.

My ego dried and sank.

Talked with your ex and we agreed

Thought of your sister helped us wank.

I'm sure you know that I have fancied her since she began high school.

But back in then, and I will promise I will let your engine cool. I have matured, I've come of age, my visions  
clear.

But there's still some things that I don't want to hear.

And I know that it was probably just those e's, but be a bit more thoughtful next time, please. While I'm alive,  
well, I just drive.

Each time I scored I just got bored.

And that's no bollocks ... I am just a slut.
