

Getting Over You

The Used

I still remember, all the back and forth
I couldn't stay away
and I couldn't take it, like a cold wind blows
You're calling out my name
and now it haunts me
Softly fading are the memories of your face
I should've listened when you whispered my name,
still you couldn't see (couldn't see)
Cause you couldn't say goodbye,
now I cannot ask you why
Although our time is through
No getting over you
Things will never be the same
I can't even say your name
I know our time is through
No getting over you (getting over you)
I still remember, as you walked the moon to stay out of the way
Memories burning like cigarettes
like the ashes call your name
Lost in the moment, when you packed your rags
and you said you couldn't stay
Left in a message that I never read
You're calling out my name
Cause you couldn't say goodbye
now I cannot ask you why
Although our time is through
there's no getting over you
I will never be the same
I can't even say your name
I know our time is through
No getting over you
You know my heart still pumps my blood all the same
It's over, there's no starting over (I will live on)
Although your memory lives on all the same
It's over (it's over)
There's no starting over, no starting over
I still remember, all the back and forth
I couldn't stay away
I couldn't take it, like a cold wind blows

you're calling out my name
Cause you couldn't say goodbye,
now I cannot ask you why
Although our time is through,
no getting over you (getting over you)
and I will never be the same
I can't even say your name
I know our time is through
no getting over you (getting over you)
No getting over you
(still your memory lives on)
Getting over you
