

Outer Space Plan

Echo Orbiter

Goodnight Saturn skies
Goodbye, the spaceship leaves tonight
Happily on our way
To take off from all the yesterdays

Just beyond the Moon
That's where we'll go
Where there's no time
And we can shine

There's no place like home
When home is there
Sail until we've found
A place content

Outer Space plan; flaming magic trip
Forever disappear and live the way we like

Listening, the air is full of sound
My life is left behind with my hometown
The lonely feeling set aside
As the spaceship begins to fly
