

# Alone

## The Green

I know there's a place that we can go  
To get away from my soul  
And everything will be alright

The sun shines all o'er my face  
Gives me the strength I need to face the world  
And all I need to know is that I got you

I don't ever want to be alone  
Take me away from the storm  
Keep me safe from harm  
And I'll be there, and I'll be there

Money man come and take away the land  
And then he flip, then he build on top the sand  
And when he feed, it's only his immediate fam  
I just don't understand

Warrior man he pull the roots from the ground  
And then he give to the entire town  
And then he feel all the love is going around  
The love is going around, whoah

I don't ever want to be alone  
Take me away from the storm  
Keep me safe from harm  
And I'll be there, and I'll be there

I know there's a place that we can go  
To get away from my soul  
And everything will be alright

The sun shines all o'er my face  
Gives me the strength I need to face the world  
And all I need to know is that I got you
