

PIECES OF A DREAM

Chemistry

I thought I saw you late last night
But it was just a flash of light
An angel passing
But I remember yesterday
Life before you went away
And we were laughing
We had hope
And now it's broken
And I could see it clearly
Once when you were here with me
And now somehow
All that's left are pieces of a dream
And now I'm lost
In restless nights
Just a whisper of the life
That we created
Shadows falling
I am calling
And I could see it clearly
Once when you were here with me
And now somehow
All that's left are pieces of a
The faded photographs
The frames of broken glass
The shattered memories
Time will soon erase
All these souvenirs
Salt from a thousand tears
But when I wake up
You are never there, ho
We had hope
And now it's broken
And I could see it clearly
Once when you were here with me
And now somehow
All that's left are pieces of a
And I could see it clearly
Once when you were here with me
And now somehow

All that's left are pieces of a dream
Pieces of a dream
