Telescope

Mirah

(Storageland EP)I'm looking up through the telescope lens
I'm wondering where does the universe end
I'll take my clothes off for meteor showers
I'll take my clothes off and climb into bedBut all the stars that shoot in the sky
They're falling in love with the sun
They're falling in love with the sunYou're terribly happy that I came home early
I've fallen asleep in the afternoon
Get under the covers i'll give you some kisses
And we'll lie on the roof and stare up at the moonBut all the dumb cats in my neighborhood
I know they'll get me soon
They'll find a way into my roomOh tell me a secret and tell me a story
Lets make up plans that will never come true
This is delicious, hey thanks for the dinner
I hear footsteps approaching, I'm hoping it's youBut all the blankets on the bed
They're tangled in heaps around you
I can't get my arms around you
They're tangled in heaps around you
I can't get my arms around you
