Black Ice - Hymn For Disco

K-os

Sometimes the way we look at life can be too serious
'Cause we're dancing by the pale moonlight
I wake up in the morning and I feel delirious
'Cause there's something that I did last night
But then the angel came off with me
She said that life was more than you see
You've got to be the change that should be
So don't die, just fly
We're just some fools with the lights on
Hope you'll be coming soon and turning up the mood
After you prove that the night's over
When are you coming back to save this heart of mine, yeah?
Time to take it slow, black ice, white snow
What if the truth is, we don't really know?
If so, then life is a mystery
This could be the end of all history
But wait, the sun rises in the east
And the world still spins 360 degrees on it's axis
This inter-galactic fact that the rhyming

Proves there's no beginning or ending of timing
And it's been a long walk
Yeah, we watch like the sun to get your back all warm
People in the party in the live game show
Once again we coming to ease off the globe
What's the definition of this thing called black?
I had a premonition, 18, way back
Black is the color of the universe from what it became
I wonder if my soul's in ice again
Fools with the lights on
Hope you'll be coming soon and turning up the mood
After you prove that the night's over
When are you coming back to save this heart of mine, yeah?
Come on
Come on
Fools with the lights on
Fools with the lights on
