Arctic Crypt

Nocturnus

Locked inside the ice below
Forgotten long ago
An alien object lies in wait
Lost beneath the snow
Seismic reacting from the north
Lights above the poles
Curious humans draws to the sight
Staking camp in the frozen night.Legends told of the evil within.
The source is soon revealed
A strange capsule, scarred by time
Covered with a foreign script
Anxious to unlock its secrets
They crack open the seat
Unleashing the beast contained inside
The frozen arctic cryptLegends told of the horror within
An ancient traveler of the stars
Left entombed until disturbed by man
Bringing death into their land
