

Synthesized I Want You Synthesized

Joy Electric

one, two, three
and then the glowbugs fly free
navigate the craft "electro joe"
the imaginary four pole pendulum
threads the super strings of life support
you build the links to my heart(chorus)
synthesized i want you synthesized
to create a new life you're the multiplier of equations
you design the math of pin point parts
time and age are tools of your experiments
you affect the course of electrons
you build the links to my heart
