

Shining Stars

[Chad Elliott](#)

Just do this once just to entertain me. Just close your eyes and imagine the sea. Open up so you can see the sky. Its gorgeous ou tonight but its slipping by, the shining stars, the shining stars, the shining stars. The shining stars burning deep in the night. Once and awhile you wanna run away, from all the rules you swore you'd never obey.

It's an open field and a mountain highway. As the crow flies, it's not very far away, from the shining stars, the shining stars, the shining stars burning deep in the night. So say a prayer and try to think of me, cause I've gone away to chase down this crazy dream. I think of you every time I sing a song. I'll think of you when I'm lying on my back looking on, the shining stars, the shining stars, the shining stars burning through the night. The shining stars, the shining stars, the shining stars burning in the night.
