Let Me Hear

Dima Lancaster

PRE-VERSE

You guys don't notice that we
Are gifted just by being humans
We are absolute predators
We do not even have any enemies
Maybe there's an animal watching us
And thinking that
Someday we'll be broken down

VERSE

Oh, we have the brain to think hard
Endless palettes of emotions
Yes, we are, without doubt
Human beings, many small lives

Some will come (some will come)
Others go (others go)
Tell me what we're dying for (where is our savior?)
Where is our savior?
Will we ever find out (when will we find out, yeah)?

When everything falls apart we are (yes, we are)
Holding tight

CHORUS

Ah, keep rising starward with me
As the universe cries over the world beneath
There's a light shining on at the end of the sky
It's blinding my eyes

(What have I been living for?
When will I find the answer?
The answer that is only for you
What will it all look like
When we run out of time?
Of all our time?)

VERSE 2

We are superior
(The will to live prevails in our weak bodies)

Stand up as one, and we will outlast
(So tell me what's inside)

Tell me what's hiding inside of us
Unleash the parasyte
NOW!!

BREAKDOWN

CHORUS 2/BRIDGE

I hold out my hands to the sky
And the tears that we've cried now
finally start to dry

I can see the glimmer of dawn
In your eyes so lone

POST-BRIDGE

What do we live for?
A lifetime to think over
'Cause there's a million questions scattered all
around the Earth

Ah, just give me the answer I need to know
What is that you have been reaching for?
Just let me hear

(So tell me what is right when all I see is wrong
Will we live longer than the ones below?
Your voice will take away all my fear
Let me hear
Let me hear
Let me...)
