

Let it Burn

The Orwells

Can we keep up the good times?
Just don't let me down
You get love every time that I come around
Take the good with the bad
Oh, get out of my town
Ripped your pictures on my wall
To forget it I just let it burn
I just let it burn
How many times do I got to tell you?
And when will you ever learn?
I just let it burn The night I left we had just left
And you were full of concerns
She was wet in my bedroom
My stone, it was turned
Is it love, is it lust?
Girl, I just never learn
Just back out, walk away
And watch me let it I just let it burn
I just let it burn
How many times do I got to tell you?
And when will you ever learn?
I just let it burn I just let it burn
I just let it burn
How many times do I got to tell you?
And when will you ever learn?
I just let it burn
