

Open Air

Frank Ocean

I have my feet in the water and ride when I was bout to get up
Ohh suddenly I caught yea, with a hook line and sinker
You were swimming in the bottom (yea)
I said why you gonna live down there
Well baby you can love up here on land
And what a difference it makes you will see
What a difference it makes to breathing
What a difference it makes it easy to love
The open air makes it easy so easy to love
The open air makes it easy easy to love
I swear the air is so much better up here then down there
Ohh the air makes it easy easy to love
You said your feeling ways that you never
Couldn't feel with all that pressure
Use to being dark at night and your kinda afraid to realize
That you still crack a smile cuz it makes you feel alive
And what a difference it makes you will see
What a difference it makes to breathing
What a difference it makes it easy to love

The open air makes it easy so easy to love
The open air makes it easy easy to love
I swear the air is so much better up here then down there
Ohh the air makes it easy easy to love
Baby I could show you the world
And the city that's inside of my heart baby
Don't know how you got a man in the first place
Just promise that you wont go back in again
Its better up here you know
Just tryin my best to show you
You started to feel like your floating higher and higher and im ever the one the man that makes
The open air makes it easy so easy to love
The open air makes it easy easy to love
I swear the air is so much better up here then down there
Ohh the air makes it easy easy to love
The open air makes it easy so easy to love
The open air makes it easy easy to love
I swear the air is so much better up here then down there
Ohh the air makes it easy easy to love
