

# The Hunger

Winston Tong

(D. Dokken/ B. White)

What's wrong with you may be right for me  
Don't need to feel your sympathy, no  
In the dark I feel at home  
I need the night to make my feelings known  
All right, like a lone wolf, can't you see  
Living false realities  
Do you know just how I feel, can't explain it, but it's real  
Lost in a world full of fear, it gives me passion  
I'm just a lone wolf who's waiting  
Waiting for life's attraction to give me  
1st CHORUS:  
The hunger...burning in my soul  
With the hunger...everybody knows  
It's the hunger...give me what I need  
With the hunger...satisfaction guaranteed  
Blackened sky on a full moon rise  
Destiny, it calls to me  
Some call it love, some call it more  
I'll play that game if it gets me through the door

All right, like a lone wolf, can't you see  
Living false realities  
Do you know just how I feel, can't explain it, but it's real  
Lost in a world full of fear, it gives me passion  
I'm just a lone wolf who's waiting  
Waiting for life's attraction to give me

2nd CHORUS:

The hunger...burning in my soul  
With the hunger...everybody knows  
It's the hunger...give me what I need  
With the hunger...take a walk with me

BRIDGE

On the night I call your name  
As we stop to play the game  
Is it love, or fantasy  
Living false realities

SOLO

1st CHORUS

The hunger (3x)  
It's the hunger...
