

Heavens Already Here

Collective Soul

Wake up to a new morning
Got my babe by my side
Now I won't yield to a new warnings
'Cause I got my piece of mind Who could bring me heaven
When heaven's already here?
Who could bring me heaven
When heaven's already here? No more living in darkness
Now that love lights my way
I don't need any new changes
To make me love today Who could bring me heaven
When heaven's already here?
And who could bring me heaven
When heaven's already here?
