

Lighthouse

New Villager

Keep it up, don't stop don't lose your place
Keep it up, don't stop don't lose your place
Keep it up, don't stop don't lose your place
Keep it up, don't stop don't lose your place How you going to get your hands inside the real thing
When you go I need your minds sleeping
Time to understand your place and trees and build and build
The time to dream is almost over, over
Go by the silver daughter, put it all your own and see
The people call you, stand a lonely statue Go out go straight up to the lighthouse
Go out go straight up to the lighthouse
See what you never... see
See what you never Time to light the fire
Build a deer inside our home
From wood upon the rooftops
We see the people stirring
Time to understand your place and trees and build and build
The time to dream is almost over, over Go out go straight up to the lighthouse (lighthouse)
Go out go straight up to the lighthouse
See what you never... see
See what you never (never) Go out and break out the dark house
We don't have to stare out st the old town
The picture is gonna make me sense
You have no time left to pay so (what)
I don't know just baby go take two steps on the right road
No time to hold hands with both hands
You don't have to be the one to knows where to build a home, put a baby in it
Let old things drop, old people never admit it
Don't know where my baby go take three steps on the right road Don't know don't stop don't lose your grip
Don't know don't stop don't lose your grip
Don't stop stop
Go out go straight up to the lighthouse see what you never
Go out go staright up to the lighthouse see what you never Up to the lighthouse (go up go up go up)
Go out go straight up to (up to)
Go up go straight up to the light house (lighthouse)
See what you never...
