That Song

Satanic Surfers

I could write a thousand songs about my anger but it wouldn't change a thing in this world
I know that for a fact but it makes me feel a whole lot better
That's why I do this in the first place
I could write a thousand songs about my anger but it wouldn't change a thing in this world
I know that for a fact but it makes me feel a whole lot better, that's why I do this in the first placeIt's not my purpose to speak for anyone else, hold no answers
Nor solutions, that song can only bring consolation for a while
But it cannot act on your behalf
So if you are aware and you know where the problem hides, don't sit around blaming it on society,
That song might be a tool of revolution but it sure ain't meant as a commodity soSing along to the slogan filled refrain but don't let it numb your brain,
Change doesn't come in any songThat song won't save us (x2)
