

That Song

Satanic Surfers

I could write a thousand songs about my anger but it wouldn't change a thing in this world

I know that for a fact but it makes me feel a whole lot better

That's why I do this in the first place

I could write a thousand songs about my anger but it wouldn't change a thing in this world

I know that for a fact but it makes me feel a whole lot better, that's why I do this in the first place It's not my

purpose to speak for anyone else, hold no answers

Nor solutions, that song can only bring consolation for a while

But it cannot act on your behalf

So if you are aware and you know where the problem hides, don't sit around blaming it on society,

That song might be a tool of revolution but it sure ain't meant as a commodity so Sing along to the slogan filled

refrain but don't let it numb your brain,

Change doesn't come in any song That song won't save us (x2)
