

Turn Off the Night

Richard Marx

I think about you every time
I take a breath and then
I let it go
I remember when you were mine
But you were just a dream
I used to holdNow if there's no sleep
Cause every star
Is lighting up,
Following these memories haunting
Knowing there's so much of you am still wanting
Here with me
I pray for the dark
Cause if it comes
Maybe some how I'll be alright
If I could just turn out the nightI think about the way you used to say my name
And how it made me feel everything
Now am looking for anyway
To make it through one thing
The morningBut there's no sleep
Cause every star
Is lighting up,
Following these memories haunting
Knowing there's so much of you am still wanting
Here with me
I pray for the dark
Cause if it comes
Maybe some how I'll be alright
If I could just turn out the nightIf only I
Could just close my eyes
I'll finally be over youNow if there's no sleep
Cause every star
Is lighting up,
Following these memories haunting
Knowing there's so much of you am still wanting
Here with me
I pray for the dark
Cause if it comes
Maybe some how I'll be alright
If I could just turn out the night
