

Staying Power

Barry White

I'm not goin' nowhere
I'm stayin', baby I'm stayin'
You know why?
I've got staying powerBaby, I've made plans
In a fancy restaurant where we can dance
Put on my favorite dress
You know the one that oozes sexinessTonight when we make love
I'm goin' to work your body with my tongue
Oh baby, my mission's clear
There's more than love that keeps you hereI've got staying power
Just when you think it's over
I'll come right back again
I've got staying power
Just when you think it's over
I'll come right back again
I've got staying power
Just when you think it's overSlow down, don't heat so fast
Anticipation makes a good thing last
Tease me with your emotions
Soon we'll share nature's body lotionAre you ready to free?
Girl you know you got just what I need
Oh baby, my mission's clear
It's more than love that keeps you hereI've got staying power
Just when you think it's over
I'll come right back again
I've got staying power
Just when you think it's over
I'll come right back again
I've got staying power
Just when you think it's over
I'll come right back againNo, baby I'm not going anywhere
No, no, no I'm not going anywhere
I'll be here
I'll be here
For years and yearsTonight when we make love
I'm going to work your body with my tongue
Oh baby my mission's clear
There's more than love that keeps you hereI've got staying power
Just when you think it's over

I'll come right back again
I've got staying power
Just when you think it's over
I'll come right back again
I've got staying power
Just when you think it's over
I'll come right back again I've got staying power
Just when you think it's over
I'll come right back again
I've got staying power
