Destination Vertical

Masha Qrella

Descending from the mountain peaks
My knees are trembling I feel weak
The sun reflected from the snow above
We hardly see the things we left behindThe destination we reached it
Now we're back to earth
The destination we reached it
Now we're feeling worseDescending from the mountain peaks
My knees are trembling I feel weak
The sun reflected from the snow above
We hardly see the things we left behindThe destination we reached it
Now we're back to earth
The destination we reached it
Now we're feeling worse
