

# What You Wanna Hear

Jorge Calderón

I see you're laying in my shadow  
and I know it's you that matters  
and my mind is so desperate  
So I'll stop  
I won't let you just walk on by  
I won't let you just walk on by  
If only I could think of what you wanna hear  
I can be a creep or (?) my life's over  
Now believe, I see how much you mean to me  
Think about the moment, look me in the eye  
Tell me that you want to give it a try  
And your make believe could be our reality  
Cut my ties and my heartache  
'Cause nothing matters any more  
This time is so perfect  
I'll look back  
I won't let you just walk on by  
I won't let you just walk on by

If only I could think of what you wanna hear  
I can be a creep or my life's over  
Now believe, I see how much you mean to me  
Think about the moment, look me in the eye  
Tell me that you want to give it a try  
And your make believe could be our reality  
Well the toughness still, in a moment turns real life  
I struggle through my mind  
But still have no words to say how I  
Just know it could be right  
But now I've got an answer in the light  
the moment passed me by  
If only I could think of what you wanna hear  
I can be a creep or my life's over  
Now believe, I see how much you mean to me  
Think about the moment, look me in the eye  
Tell me that you want to give it a try  
And your make believe could be our reality
