

Coma Black

Marilyn Manson

[Incomprehensible]My mouth was a crib and it was growin' lies
I didn't know what love was on that day
Heart's a tiny blood clot
I picked at it
It never heals, it never goes awayI burned all the good things in the Eden eye
We were too dumb to run too dead to die
Burned all the good things in the Eden eye
We were too dumb to run too dead to dieThis was never my world
You took the angel away
I killed myself to make everybody pay
This was never my world
You took the angel away
I'd killed myself to make everybody payI would have told her then
She was the only thing
That I could love in this dying world
But the simple word love itself
Already died and went awayThis was never my world
You took the angel away
I killed myself to make everybody pay
This was never my world
You took the angel away
I killed myself to make everybody payI burned all the good things in the Eden eye
We were too dumb to run, too dead to die
I burned all the good things in the Eden eye
We were too dumb to run, too dead to dieThis was never my world
You took the angel away
I killed myself to make everybody pay
This was never my world
You took the angel away
I killed myself to make everybody payThis was never my world
You took the angel away
I killed myself to make everybody pay
This was never my world
You took the angel away
I killed myself to make everybody payThis was never my world
You took the angel away
I killed myself to make everybody pay
This was never my world
You took the angel away

I killed myself to make everybody payHer heart's blood stained egg

We didn't handle with care

It's broken and bleeding

And we can never repairHer heart's blood stained egg

We didn't handle with care

It's broken and bleeding

And we can never repair

And we can never repair
