

Bad Light

Built To Spill

Never forever
What I think is true
Never forever
What I hope to do
Never forever
What I got from you
Never forever
Never forever
What I think is true
Never forever
What I hope to do
Never forever
What I got from you

Never forever
And all that sun makes so much shine
How this is done like so much science
Can't be explained through common sense
Takes a firm background in remembering
And it takes some math
And there's so much more
It's so hard to read in bad light
It's so hard to read in bad light
It's so hard to see it bad light
It's so hard to see it bad light
