

# What Would You Do

[INXS](#)

I've come a long way by car  
The road went narrow  
The bridges too far  
Screaming at ninety  
Whisper at ten  
Feel the towns make you spend Look see the story  
What would you do?  
All the facts before me  
What would you do? Another city phone rings  
Letting tears come through  
Mixed among feelings  
Fed on your body  
Fed on your mind  
Words that always remind Look see the story  
What would you do?  
All the facts before me  
What would you do? Closed eyes and no more breathing  
A trick I had played  
To scare the living  
She laughs at my game  
Questions if I'm sane  
And all we can do is grin Look see the story  
What would you do?  
All the facts before me  
What would you do? Look see the story  
What would you do?  
All the facts before me  
What would you do?
