

# Gasoline

## Ketsia

The sun goes down  
Knock on the door hits him to the ground  
Nowhere to run, cuz they got him now  
Didn't he hear their voices Back of a car  
No words spoken as the engine starts  
Nowhere to look but up at the stars  
Doesn't even have no choices....I've been looking for you  
You've been looking for me  
We can take on the whole world now...Let's light a fire  
Light up everything that you see  
Let it all fall to its knees  
Tonight it's only just you and me  
Take me higher  
Take me to a thousand degrees  
I'm begging you keep it up please  
Tonight it's only just you and me  
And a little gasoline Midnight  
Guards are asleep and it's  
Tonight, to make your escape you can  
Win this fight if anyone tries to stop you  
Outside, just look for a car c'mon get  
Inside you can make it far, we can run  
and hide, and no one's gonna come and find you I've been waiting for you  
You've been waiting for me  
We can take on the whole world now...Let's light a fire  
Light up everything that you see  
Let it all fall to its knees  
Tonight it's only just you and me  
Take me higher  
Take me to a thousand degrees  
I'm begging you keep it up please  
Tonight it's only just you and me  
And a little gasoline They'll remember my name  
They'll remember your face  
They'll be teaching their kids  
About the time and the place  
When they burned 'em to the ground  
Come on let's burn em down
