One for You

The Knife

Rumors telling me you are mourning
And you haven't slept for several days
You've been turning inside out, looking for reasons
And your black sorry eyes made you paleAnd you couldn't catch them
You couldn't be there
You couldn't help them at all
And it was coldIf we say there is something above the mountains
If we say that there is something we can't see
Promise you will never believe me
'Cause I guess I'm just trying to make it easyEverybody was laughing when they found us
One for you and one for me
Then they let us go to hunt us down again
And still you refuse to see
Why everything has to stay ugly
