Unfamiliar Ceilings

Fightstar

Some of us will learn what none of us should know
Smoke can fill this room, there'll be nothing left to show
Hold on to the ones you love
There won't be time to show enoughWe need each other like flower pots and dirt
For seven years we've spent growing from the earth
It's hard to see how all of this will end
For the consequence of a broken heart to mendStay awake with me, it's getting light outside
When time is still, for you it hurries
Stay awake with me so I can see the sun
Rising up upon your shoulderPeople change their ways when there's nothing there to lose
Coffee talk and crimes runs cold blood through our time
You won't recall all your wins but the toughest beats
Will haunt your heart and mind, mindStay awake with me, it's getting light outside
When time is still, for you it hurries
Stay awake with me so I can see the sun
Rising up upon your shoulderStay awake with me, take this picture
And move your face a little closer
Stay awake for me, close the window
And stop this room from getting colderSome of us will learn what none of us should know
Smoke can fill this room, there'll be nothing left to showStay awake with me, it's getting light outside
When time is still, for you it hurries
Stay awake with me so I can see the sun
Rising up upon your shoulderStay awake with me, take this picture
And move your face a little closer
Stay awake for me, close the window
And stop this room from getting colder
