

# With You

Juice Newton

It doesn't matter if the stars won't light  
It doesn't matter if the moon ain't right  
It's true, as long as I can see 'em with you  
It doesn't matter if the birds don't sing  
It doesn't matter if the bell won't ring  
It's true, as long as I can hear 'em with you  
Things that really matter you don't need to see  
The only thing I care about is you and me  
Someone told me I was happy, I wouldn't disappear  
It doesn't matter if you fall apart  
It only brings you closer to my heart  
It's true, as long as I can feel it with you  
Spending time together, holding to each other  
Liking what I'm seeing, liking what I'm seeing  
(You know I'm liking what I'm seeing in you)  
Feeling it together, doing it together, oh-oh  
You know it's true, I love to be with you  
It doesn't matter if we go or stay  
It doesn't matter if we waste a day  
It's true, as long as I can do it with you  
Things that really matter you don't need to see  
The only thing I care about you and me  
Someone told me I was happy, I wouldn't disappear  
It doesn't matter if the stars won't light  
It doesn't matter if the moon ain't right  
It's true, as long as I can see 'em with you  
I wanna see 'em  
I wanna be with you  
I wanna be with you
