

Like You

Kelis

Your appearance turn me on
Your natural self, it's really comin' on strong
There's not too many dudes that catch my eye
But if you stick around I'll give you a slice of the pie
I don't just like you, I like you like you
I don't just like you, I like you like you
Can we come together? Can we come together?
You can fluff my feathers, fluff my feathers
First date's goin' real well
He's makin' me hot or is it his cock?
(Aw damn)
No matter the case we get along swell
So whatever if we started tonight, we're gonna

So whatever if we started tonight, we're gonna
So whatever if we started tonight
I don't just like you, I like you like you
(So whatever if we started tonight)
I don't just like you, I like you like you
(So whatever if we started tonight)
Can we come together? Can we come together?
You can fluff my feathers, fluff my feathers
I don't just like you, I like you like you
I don't just like you, I like you like you
Can we come together? Can we come together?
You can fluff my feathers, fluff my feathers
