

# Rusted

## Premium

Rush through the rusted veins  
Illuminate the voice of one  
    So I have lied  
    So I'm aware about  
        The consequence  
        I heard the warning  
    About the little compromise  
        Distorted views you had  
        I heard the warning  
        Cold white spring  
    A wordless song I'll sing  
        I, a white cloud  
All my thoughts are in doubt
